

Six reasons to choose **Ezi-action®** Drumpumps

1. Method of choice for hand dispensing

The Ezi-action® Drumpumps are increasingly becoming the method of choice worldwide for hand dispensing a variety of liquids safely and reliably from 25 litre, 60 litre, 110 litre and 200 litre containers.

2. Excellent for wide range of liquid products

Due to the patented pumping principle there is no friction to be overcome in the low pressure, high volume pumping action and no parts to wear or jam. Harsh chemicals even containing mild solvents and viscous fluids can be safely and reliably dispensed.

3. Reliability

As a testimony to quality the Ezi-action® Drumpumps come with a 24 month manufacturer's warranty. The Drumpump is not warranted against misuse or for pumping petrol or strong solvents.

4. Serviceability

In the event of long term chemical attack on the flap valves service kits ensure continuous pumping for the more than 5 years expected life of the Ezi-action® Drumpumps under normal conditions.

5. Safety

The anti-pumping safety strap deters access and protects against accidental discharge.

The swivel spout turns upwards to prevent drips.

The one litre calibrated Safety Measure provides a totally enclosed system that enhances chemical safety programmes.

6. Customer loyalty

Ezi-action® Drumpumps build loyalty to liquid products and add value by solving the problem of how to dispense fluids safely and reliably.
